SUMMARY

Full-Stack Developer with 4+ years of experience building scalable web applications, e-commerce platforms, CMS solutions, and custom business systems. Strong expertise in PHP, Laravel, WordPress, WooCommerce, React, Next.js, Node.js, and modern JavaScript ecosystems. Experienced in API integrations, payment gateways, cloud deployments, database design, Linux-based server administration, and production support. Proven track record of delivering 30+ offshore and onshore projects while managing production environments, troubleshooting critical incidents, and remediating compromised web applications with minimal downtime and no data loss.

EDUCATION

Savitribai Phule Pune University
Bachelor of Vocational (Software Development)

EXPERIENCE

Senior Software Developer 13 Dec 2021 to 15 Jun 2026
SiGa Systems Pvt. Ltd. *Pune, India*

Responsibilities

- Developed full-stack web applications using PHP, Laravel, React, Next.js, and JavaScript.
- Built RESTful APIs and scalable backend systems.
- Developed and customized WordPress and WooCommerce solutions.
- Managed Linux-based production environments and deployments on AWS.
- Diagnosed and resolved production issues and secured compromised applications.
- Collaborated across the software development lifecycle.
- Delivered 30+ client projects across multiple industries.
- Built and maintained 10+ web applications.
- Developed reusable WordPress plugins and integration frameworks.
- Architected systems including HRMS platforms and marketing integrations.
- Recovered and secured compromised websites without data loss.
- Reduced downtime through proactive monitoring and troubleshooting.
- Recognized with the "Emerging Leader" award for technical contributions.

PROJECTS

Internal HRMS System | Tech Stack: Laravel, Inertia.js, React, TypeScript, PostgreSQL, Database Design

- Designed and developed a comprehensive Human Resource Management System for internal organizational use.
- Architected the application structure and database design for a modular HRMS platform supporting employee management, attendance, payroll, asset management, helpdesk operations, learning management, audit tracking, and exit management.
- Focused on database normalization, data integrity, reporting efficiency, and long-term scalability.
- Designed workflows supporting the complete employee lifecycle and organizational operations.

Eloqua Forms Integration Plugin | Tech Stack: PHP, WordPress, JavaScript, jQuery Plugins, MySQL, Eloqua API

- Designed and developed a reusable WordPress plugin for integrating website forms with Oracle Eloqua.
- Built a custom form rendering and processing system with spam prevention and validation mechanisms.
- Implemented WordPress Actions and Filters to support extensibility and project-specific customizations.

- Developed custom database tables and an administrative interface for managing form submissions.
- Architected the plugin for reuse across multiple websites within the client's ecosystem.

UltraEdit Licensing & Checkout Integration | Tech Stack: PHP, WordPress, MySQL, CleverBridge API, REST APIs, Webhooks

- Developed a licensing management system integrated with CleverBridge for software sales and subscription management.
- Built secure checkout, license activation, renewal, and refund workflows.
- Implemented webhook-driven synchronization between WordPress and CleverBridge.
- Automated license generation, validation, and customer account management.
- Developed administrative tools for managing licenses, subscriptions, and customer records.

Short Film Submission & Streaming Platform | Tech Stack: PHP, WordPress, WooCommerce, AWS S3, MemberPress, MySQL

- Developed a platform for filmmakers to submit, manage, and stream short films.
- Implemented AWS S3 multipart uploads for handling large video files efficiently.
- Integrated MemberPress for subscription and membership management.
- Built secure content access workflows and media management functionality.
- Developed custom backend features and administrative tools.

Next.js Blog Platform with Sanity CMS | Tech Stack: Next.js, React, TypeScript, Sanity CMS

- Developed a modern content-driven platform using Next.js and Sanity CMS.
- Implemented dynamic content rendering and SEO-focused architecture.
- Built reusable UI components and scalable content management workflows.
- Improved website performance through server-side rendering and optimization techniques.

TECHNICAL SKILLS

Languages: PHP, JavaScript, TypeScript, SQL

Frontend: React.js, Next.js, Tailwind CSS, HTML5, CSS3

Backend: Laravel, CodeIgniter, Node.js, Express.js, REST APIs, JWT Authentication

CMS & E-Commerce: WordPress, WooCommerce, Sanity CMS

Databases: MySQL, PostgreSQL, MongoDB

Cloud & Infrastructure: Ubuntu Linux, AWS EC2, AWS S3, Apache, NGINX, cPanel, CI/CD

Production & Security: Server Administration, Production Debugging, Website Security & Malware Remediation

Tools: Git, GitHub, VS Code, Postman
